

Our school uses the app "Schulstest Online" to document the self-tests according to Corona VO School, §3 Testing

01.01.2021

Dear Parents of [example school]

due to the Corona regulation of the state, it is necessary that you continue to test your children before school.

As this process takes a lot of time for you and for us to check the documentation, our school will from now on use the free app "Schulstest Online". This makes the work easier for us and for you, as well as time-consuming enquiries if, for example, there is incorrect information on the documentation sheet or documentation sheets are forgotten.

The app Schulstest Online for Android and iOS smartphones and tablets was developed in cooperation between teachers, programmers and idea providers from the Karlsruhe School and Sports Office and ensures that teachers can start teaching in an uncomplicated, quick and safe way. You can find more information at <https://www.schulstest-online.de>.

The use and installation of the app is voluntary. If you do not wish to use the app Schulstest Online, you and your child will not suffer any disadvantages. You can then hand in the confirmed self-test by sheet [at school / to the class teacher] as before.

You can find the free app "Schulstest Online" in the App Store (iOS) or Google Play Store (Android). Log in with the anonymous user ID and password that you will receive from your child shortly. You will then receive a test reminder via the app. In future, test your child the day before your child comes to class, take a picture of the test result of the strips on the test body in the app with your smartphone and send the picture of the test result.

All user accounts and test results are assigned anonymously, no personal data is processed in the entire sending process. Only your child's teacher on site at school can decode the numerical code. Only official school equipment is used for this purpose. The images are stored exclusively on German servers and will be deleted after 10 versions.

With kind regards

---
